# Manage Location

**Pickup Locations** Screen Options ▾

**Add Pickup New Location**

**Name**  
  
The name is how it appears on your site.

**Slug**  
  
The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

**Parent Item**  
None ▾  
Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.

**Street address**

**City**

**Post code\***

**Country\***

**Email**

**Phone**

**Table:**

Bulk actions ▾  1 item

<input type="checkbox"/>	Name	Slug	Count
<input type="checkbox"/>	Pune	pune	0
<input type="checkbox"/>	Name	Slug	Count

Bulk actions ▾  1 item

**1.Name:-** Give the name to the warehouse.

---

**2.Slug:-** Enter the slug.

---

**3. Parent Item:-** Select the parent location from the drop-down.

(Explanation of sublocation feature -> When you create one parent location, under parent location you can create sub-location.

For example -> I have created California as a parent location and two sub-location under California, Los Angeles, and San Diego. Then I will go to the product edit section and add stock quantity in Los Angeles as 4 and in san, Diego as 3 additions of both sublocation stock quantities will reflect in California as 7, But on the website, customers

can see only California location and California stock quantity total 7. They can not see this sublocation )

---

**5. Street Address:-** Enter street address.

---

**6. City:-** Enter your city.

---

**7. Zip Code:-** Enter your zip code.

---

**8. Country:-** Enter your Country.

---

**9. Email:-** Enter the email address.

---

**10. Phone Number :-** Enter the phone number of warehouse

---
